

| Bulk Analysis |                                                          |
|---------------|----------------------------------------------------------|
| Type          | Description                                              |
|               | Assay                                                    |
| AA            | Atomic Absorption                                        |
| AES           | Atomic Emission Spectroscopy                             |
| LECO          | Combustion Analysis (H, C, N, O, S)                      |
| CTE           | Coefficient of Thermal Expansion                         |
| DSC           | Differential Scanning Calorimetry                        |
| DMA           | Dynamic Mechanical Thermal Analysis                      |
| DTA           | Differential Thermal Analysis                            |
| EPR           | Electron Paramagnetic Resonance                          |
| EPMA          | Electron Probe MicroAnalysis                             |
| ESR           | Electron Spin Resonance                                  |
| FTIR          | Fourier Transform Infrared Spectroscopy                  |
| GDMS          | Glow Discharge Mass Spectrometry                         |
| GD-OES        | Glow Discharge Optical Emission Spectroscopy             |
|               | Gravimetry/Density/Specific Gravity/Melting Point        |
| ICP-OES       | Inductively Coupled Plasma Optical Emission Spectroscopy |
| ICPMS         | Inductively Coupled Plasma Mass Spectrometry             |
| IGA           | Instrumental Gas Analysis (H, C, N, O, S)                |
| IC            | Ion Chromatography                                       |
| LA-ICPMS      | Laser Ablation Inductively Coupled Plasma Mass Spec.     |
| NAA           | Nuclear Activation Analysis                              |
| NMR           | Nuclear Magnetic Resonance                               |
| OES           | Optical Emission Spectroscopy                            |
| PIXE          | Particle Induced X-ray Emission                          |
| BET           | Porosimetry/Surface Area (Brunauer-Emmett-Teller)        |
| Raman         | Raman Spectroscopy                                       |
|               | Residual Stress                                          |
| RIMS          | Resonance Ionization Mass Spectrometry                   |
| SAXS          | Small Angle X-ray Scattering                             |
|               | Speciation (Chemical State)                              |
|               | Specific Heat                                            |
|               | Thermal Conductivity                                     |
| TIMS          | Thermal Ionization Mass Spectrometry                     |
| TMA           | Thermo Mechanical Analysis                               |
| TGA           | Thermogravimetric Analysis                               |
| WDS           | Wavelength Dispersive Spectrometry                       |
| WDX           | Wavelength Dispersive X-ray                              |
| XRD           | X-ray Diffraction                                        |
| XRF           | X-ray Fluorescence                                       |
